

ÂU NGỌC DIỆP

Full-Stack Developer

District 10, HCM City · [+84 764 699 015](tel:+84764699015) · diepau1312@gmail.com · github.com/diepAu13122001

SUMMARY

Self-driven Full-Stack Developer with a passion for backend systems and product thinking. Built a production-ready Finance Tracker SaaS (React 18 + Spring Boot 3 + PostgreSQL) with 3-tier subscription gating, CI/CD via GitHub Actions, and deployment on Railway & Vercel. Currently working as a Coding Mentor at MindX Technology School while expanding full-stack and DevOps skills through real-world personal projects.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, SQL

Backend: Spring Boot 3, Spring Security, Spring AOP, JPA/Hibernate, NestJS

Frontend: React 18, TanStack Query, Zustand, React Hook Form + Zod, Recharts

Database: PostgreSQL, MySQL, MongoDB, Flyway migrations

DevOps: Docker, GitHub Actions, Railway, Vercel

Auth: JWT, Spring Security, BCrypt

Tools: Git, IntelliJ IDEA, VS Code, Postman, Swagger

Testing: JUnit 5, Mockito, Vitest, React Testing Library

EXPERIENCE

MindX Technology School

07/2022 – Present

Lecturer & Coding Mentor

- Teach Python (desktop apps, data science with pandas/sklearn), front-end web (HTML/CSS/JS + Firebase), and game dev (GameMaker Studio 2) to teens aged 10–17
- Design and deliver hands-on project-based lessons; mentor students building real mini-apps
- Improved student project completion rate by simplifying complex concepts into step-by-step labs

PROJECTS

Finance Tracker SaaS – Personal Finance Management App

[Live Demo](#) | [GitHub](#)

React 18 · TypeScript · Spring Boot 3 · PostgreSQL · Docker · Railway · Vercel · GitHub Actions

- Designed and built a 3-tier SaaS (Free/Plus/Premium) with plan-gating via Spring AOP (@RequiresPlan annotation) on the backend and a <PlanGate> React component on the frontend — keeping business logic cleanly separated
- Built JWT authentication with plan claims embedded in tokens, eliminating per-request DB queries for authorization
- Implemented transaction CRUD with a 50/month limit enforcement for Free tier, enforced at the service layer (not just UI)
- Created flexible summary & chart APIs supporting month/quarter/year filtering; integrated Recharts for daily bar and monthly trend charts
- Configured CI pipeline (GitHub Actions) with PostgreSQL service container to run unit tests before every deploy to Railway
- Wrote unit tests: AuthService (8 cases) + SubscriptionService (7 cases) using JUnit 5 + Mockito; Vitest tests for frontend utilities and PlanGate component

Ecommerce Website – Fresh Produce Online Store

React · Spring Boot · Spring Security · JWT · MySQL · Bootstrap

- Built customer-facing storefront (product listing, search, cart, checkout) and admin dashboard (product & order management)

- Secured REST API with Spring Security + JWT; implemented role-based access control for admin vs. customer endpoints

Workout Tracker – Personalised Exercise App [Live](#)

[HTML](#) · [CSS](#) · [JavaScript](#) · [YouTube Data API](#) · [Bootstrap](#)

- Generates personalised workout playlists based on user goals using a custom search/sort algorithm; streams videos via YouTube Data API

EDUCATION

Nong Lam University, HCMC

09/2019 – 03/2024

B.Sc. Information Technology — GPA 2.87 / 4.0

Relevant coursework: Data Structures, Algorithms, Computer Networks, Database Systems, Software Engineering, Operating Systems
